The above web service has undergone Security Audit and has been certified to be safe from vulnerabilities. The contents audited were based on the temporary web service URL mentioned above.

The Web service was tested and found safe for hosting as per OWASP Application Security Verification Standard.

Based on final testing and NIC's compliance policy following recommendations are suggested:

1. Web service may be hosted with the permission of read and script for the general public.
2. The complete web service should be deployed over SSL using TLSv1.2 stable version. All weak SSL Cipher suites should be disabled.
3. Web server and OS Level hardening need to be in place for the production server.
4. All the software components used in the application should be of latest and stable version.

Note:

Projections of any Conclusions/Recommendations are based on our findings during the assessment of the website/application provided during the final level of security audit and are applicable ONLY for the same version of application within the same/recommended hosting environment. The validity of any Conclusions/Recommendations may be altered because of changes made to the application or system or the failure to make the changes to the system when required.
